

HAT1 FINANCIAL REPORTING · 2026

# Liebherr Group

## Financial Reporting and Investment Analysis 2022–2025

CENTRAL QUESTION

**Should a long-term investor take a minority stake in Liebherr – and if not, why not yet?**

**Benchmark: Caterpillar Inc. and the average of 105 listed US machinery companies**

PRESENTED BY

**Simon Beermann · Adam Fliegel · Zofia Narkiewicz · Philipp Hoffmann · Zarah Gilmore Islam**

Fontys University of Applied Sciences, Venlo · International Finance and Control · Lecturer: Kim Verspeek

THE ANSWER FIRST

# Financially sound – but not yet an adequate return

## Four findings decide the investment case

STRENGTH

**53.5 %**

**Equity ratio 2025**

Cash and current financial assets cover current debt **2.6 times**.

WEAKNESS

**2.8 %**

**Operating margin 2025**

Less than a fifth of Caterpillar (17.2 %) and the industry (15.9 %).

WEAKNESS

**–€176 m**

**Free cash flow 2025**

Negative in three of four years – investment runs ahead of cash generation.

ACCOUNTING

**1.6–2.8 %**

**Margin range in our tests**

The measurable accounting effects point to a **weaker**, not a stronger result.

**Not yet.** **Do not invest at present – reassess the case on the 2026 financial statements.**

Source: Report, Executive summary and chapters 7–8; Excel workbook, sheet Dashboard

COMPANY AND ENVIRONMENT

# Diversification kept Liebherr growing while construction weakened

**€14,772 m**
Revenue 2025, +1.0 %

**55,963**
Employees

**13**
Product segments

**1949**
Family-owned · Bulle (CH)

**Revenue 2025 by sector**

**63.3 % · Construction & mining · −5.5 %**

**36.7 % · Other · +14.7 %**

**€9,345 m vs. €5,427 m – components alone grew 35.5 %**

## External pressures

- **Demand:** European construction output forecast to grow only about 2 % a year until 2028
- **Prices and costs:** US tariffs and low-cost competitors – reported by Liebherr for its cranes
- **Financing:** ECB main refinancing rate 2.65 % (Sept. 2026) – machines cost customers more to finance

**LIEBHERR'S OWN OUTLOOK**

Orders at the start of 2026 above the previous year – further growth expected, but **no significant upswing before 2027**. US tariff policy remains a risk.

Source: Report, chapters 2 and 3 (§3.1.1) and §5.7; Liebherr-International AG (2026); EUROCONSTRUCT (2026); European Central Bank (2026)

# How Liebherr creates competitive advantage

**Differentiation in custom segments, scale in volume segments – financed by patient family capital**

## Diversified product portfolio

13 segments, from mining excavators to aerospace components, spread the market risk.

**+14.7 %**

**other segments 2025, while construction & mining fell 5.5 %**

**THE PRICE**

Stabilises revenue, but does not raise the margin.

## Vertical integration

Key technologies built in-house; own sales and service companies instead of dealers.

**29.1 %**

**PP&E in % of revenue (Caterpillar 22.4 %)**

**THE PRICE**

Capital tied up in assets and stock – inventories 42.9 % of revenue.

## Innovation & research

Research and development rose every year, fully expensed, financed from retained profit.

**€708 m**

**R&D 2025 = 4.8 % of revenue (Caterpillar 3.2 %)**

**THE PRICE**

Spending kept rising while operating profit fell 39 % in 2025.

**WHAT IT MEANS**

## The advantage is real – but it sits in the asset base, not yet in the margin.

For the investor the question is not *whether* the advantage exists, but whether it is turned into returns.

**Only €56 m of a €272 m profit was distributed in 2025.**

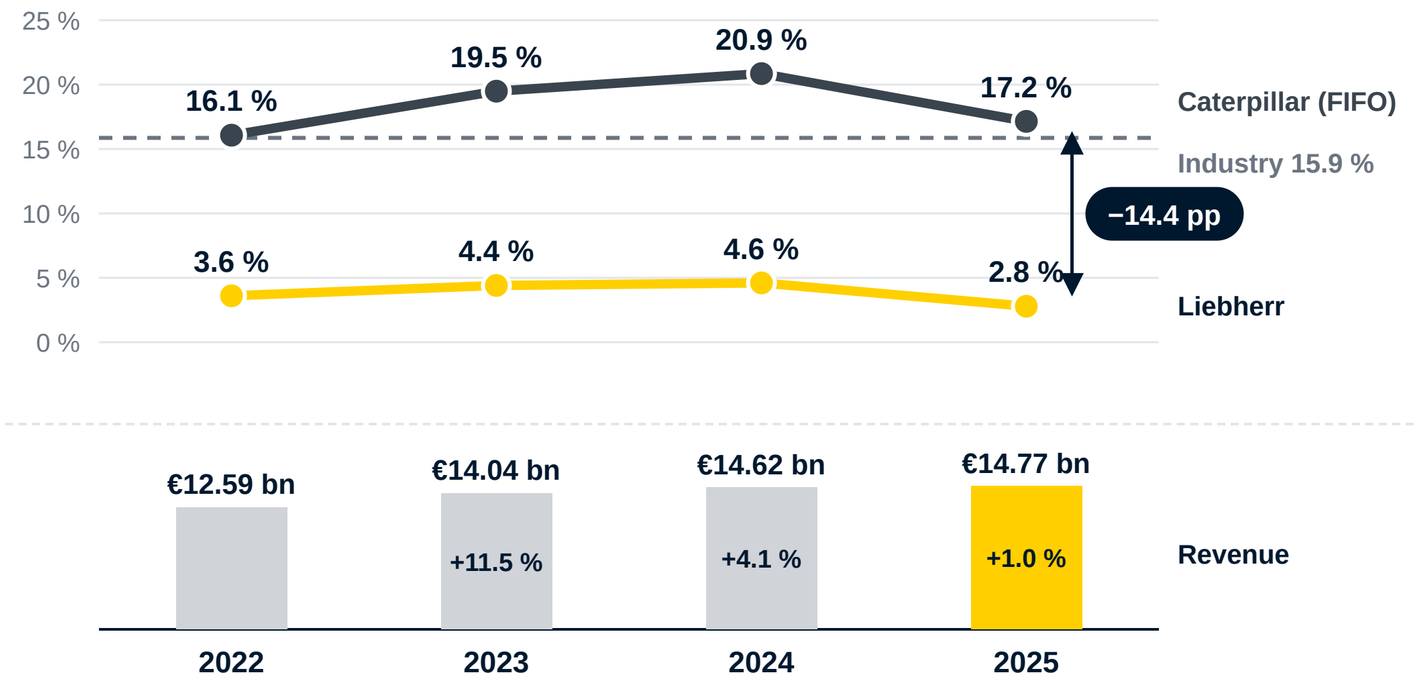

Source: Report §3.2–3.3, Appendix E (VRIO); Liebherr-International AG (2023–2026); Caterpillar Inc. (2026)

FINANCIAL PERFORMANCE

# Growth has stalled and the margin fell to 2.8 %

## Revenue still grows, but barely – and less of it turns into profit

### Operating margin (%) and revenue (€ bn), 2022–2025

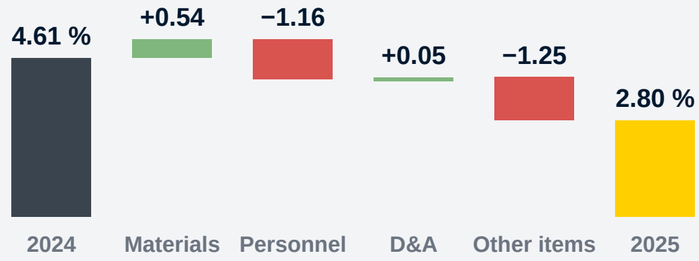

### DuPont: why the return on equity fell

pre-tax return on equity · contributions in pp

### Margin bridge 2024 → 2025

contribution in percentage points of revenue

**INVESTOR LENS** **Each percentage point of margin is worth about €148 m of operating profit**

Source: Report §5.2–5.3, Figures 1, 2a and J2; Excel workbook, sheets D4, D6, D10 and Dashboard. Caterpillar on the FIFO basis; industry = Damodaran (2026c), 2025 reference level

ACCOUNTING ANALYSIS

# Key figures rest on judgements we cannot verify

**Most room for judgement: inventories, provisions and fixed assets – and one cost line without any note**

**REPORTING LIMIT** **Summary statements only (ISA 810) · full audited statements not public · no segment note (IFRS 8 not applicable)**

INVENTORIES · IAS 2

## €6,341 m

36.3 % of total assets

- Overhead allocated at a “normal capacity” that is not defined
- Allowance for obsolete stock not disclosed

PROVISIONS · IAS 37

## €864 m

of which warranty €530 m

- Gross reversals rose from €90 m (2022) to €143 m (2025)
- But the net charge stayed flat: €195 m → €194 m

PP&E · IAS 16

## €4,304 m

25 % of total assets

- Depreciation 5.5 % of cost vs. 6.6 % at Caterpillar
- Own work capitalised €317 m = 77 % of the operating result

DISCLOSURE GAP

## +€228 m

other operating expenses 2025 (+11.7 %)

- The largest cost increase of 2025 has no note at all
- 4 of 9 red-flag tests raised a flag

**INVESTOR LENS** **The 2025 operating result is not a reliable base for extrapolation**

Source: Report §4.1–4.4, Appendix G (Table G2) and Appendix H (Table H1); Excel workbook, sheets C2 and D9

# Adjusting for comparability widens the gap

## Actual adjustment (Caterpillar) vs. illustrative sensitivities (Liebherr)

ACTUAL ADJUSTMENT · BOOKED IN THE WORKBOOK

### Caterpillar: inventories restated LIFO → FIFO

IAS 2 prohibits LIFO and Liebherr does not use it. The disclosed LIFO reserve makes the correction exact, not estimated.

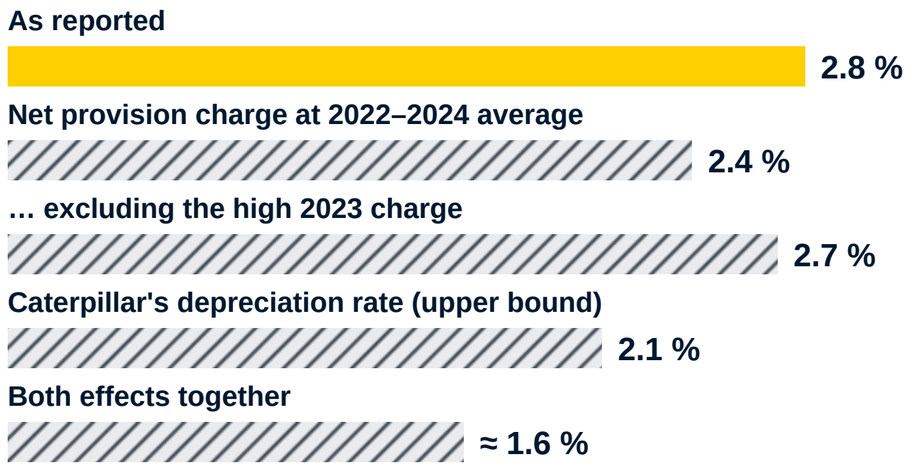

| Inventories (LIFO) | + | LIFO reserve | = | FIFO basis |
|---|---|---|---|---|
| $18,135 m | | $4,305 m | | $22,440 m |

| Equity (before tax) | Operating profit 2025 | Operating margin |
|---|---|---|
| +$4,305 m | +$441 m | 16.5 → 17.2 % |

**Also reclassified:** Caterpillar's 2022 goodwill impairment of $925 m as non-recurring. At equal depreciation the gap would be up to **15.1 pp** instead of 14.4 pp.

ILLUSTRATIVE SENSITIVITY · NOT BOOKED

### Liebherr operating margin 2025 under the findings

Own work capitalised cannot be measured. The equity ratio would still be **50.4 %** at Caterpillar's depreciation rate – the balance sheet strength holds.

INVESTOR LENS **Accounting does not rescue the case – the reported 2.8 % is, if anything, flattered**

Source: Report §4.4, §6.1, Table J9 and Table H3; Excel workbook, sheets C1 (block A), D9 and D11. Caterpillar figures in USD m, Liebherr in € m – never combined

# A strong balance sheet is financing a cash shortfall

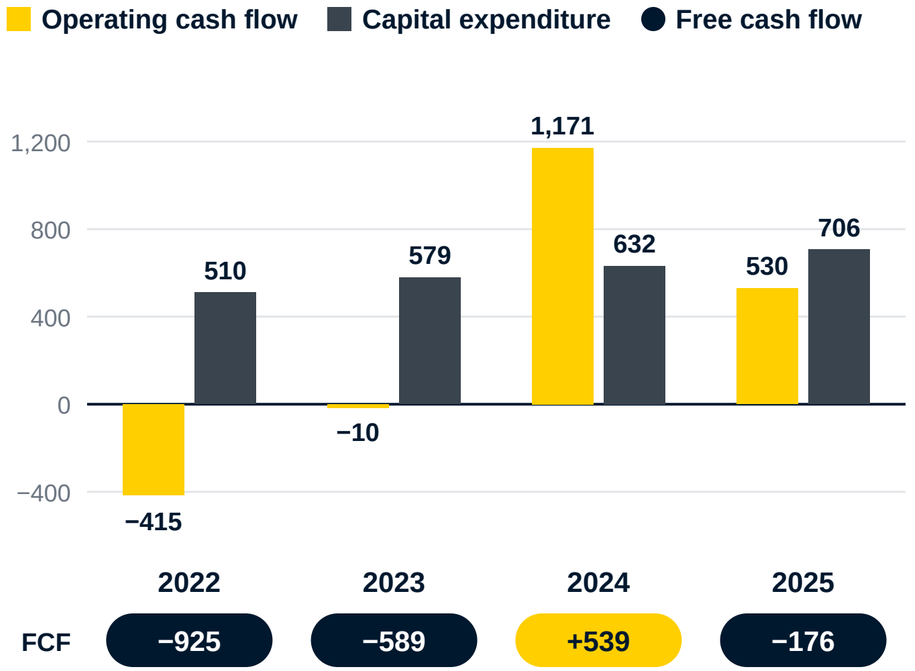

## Liquidity and solvency are solid – but investment runs ahead of operating cash flow

**53.5 %**
**Equity ratio 2025**
Bank and lease liabilities 23.7 % of capital vs. 39.3 % industry

**2.6×**
**Cash cover of current debt**
€3,147 m cash and current financial assets vs. €1,215 m

**2.90×**
**Debt / EBITDA 2025**
Up from 2.14 in 2024 – above the industry's 2.30

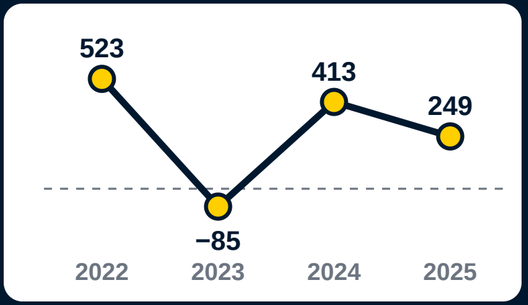

### Operating cash flow vs. capital expenditure, € m

**2022–2025 CUMULATIVE**

Capex **€2,427 m** vs. operating cash flow **€1,276 m** = **190 %**

**NET FINANCIAL POSITION, € m**

Covers the 2025 shortfall after distributions (€232 m) for only **≈ 1.1 years**.

**INVESTOR LENS** **Low risk of distress – but the cushion is shrinking**

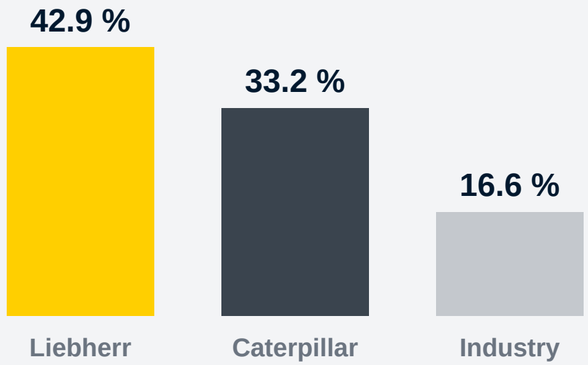

Source: Report §5.5–5.6, Figures 3 and 4, Table 2; Excel workbook, sheets D3, D5, D7 and Dashboard; industry: Damodaran (2026b)

WORKING CAPITAL

# Inventories tie up 42.9 % of revenue

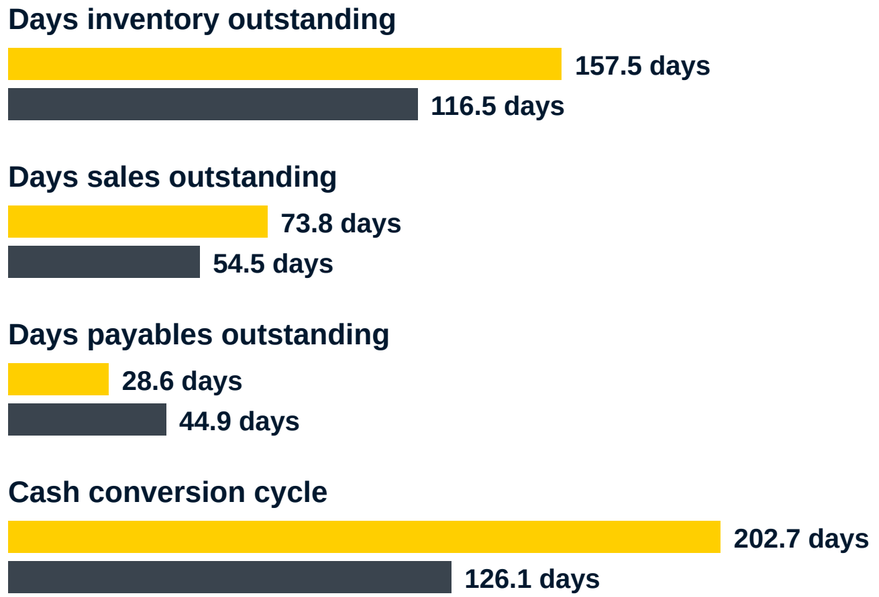

**2.6 times the industry average – the cash conversion cycle is a revenue-based proxy**

## Inventories in % of revenue, 2025

- Causes: in-house production, long order cycles, stock held by own sales companies
- Finished goods alone: €2,490 m

## Working-capital days 2025 (revenue basis)

THE LEVER

**€405 m**

released by a cycle **10 days shorter** (€40.5 m revenue a day)

**… but only once. A lasting turnaround needs margin.**

INVESTOR LENS **77 days longer cash cycle than Caterpillar – limits Liebherr’s financial flexibility**

Source: Report §5.4, Figure 2b, Table J5; Excel workbook, sheets D3 (block E) and Dashboard; industry: Damodaran (2026e). Days on a revenue basis – a proxy, as Liebherr reports no cost of sales

# What would have to change: three conditions for a reassessment

**Check them on the 2026 statements – a new assessment only if all three are met. In 2025 none of them is.**

**1** **Operating margin of at least 3.9 % (four-year average)**

Status 2025 — × 2.8 %

**2** **Free cash flow positive and, over time, covering distributions**

Status 2025 — × −€176 m

**3** **Information rights: audited statements and other operating expenses**

Status 2025 — × Not secured

**REWARD**

Resilient, diversified group · back to the 3.9 % average margin = **+€157 m** operating profit at 2025 revenue

**RISK AND LIMITS**

ROCE 3.5 % (pre-tax) vs. 7.70 % benchmark – needs a margin of ~6–8 % · minority stake: little influence, low payout, hard to sell

**Even then: meeting the conditions triggers a new analysis, not a purchase – a minority stake in an unlisted group would only make sense at a discounted price.**

Source: Report §5.3, §5.7 and chapter 8, Table 3; Excel workbook, sheets D3, D10 and D11; benchmark: Damodaran (2026a)

CONCLUSION

# Financially strong. Operationally challenged.

**1** **The balance sheet is strong – and stays strong**

53.5 % equity ratio and 2.6× cash cover; still ≈ 50 % equity ratio in our depreciation sensitivity.

**2** **Returns and cash generation are too weak**

2.8 % margin, 12.5–16.2 pp below Caterpillar in every year; free cash flow negative in 3 of 4 years.

**3** **The accounting sharpens the verdict**

The measured effects point to a margin of 1.6–2.8 %, and key estimates cannot be verified from outside.

**Not yet: the investor should see the turn in the figures before committing capital.**

# Thank you.
